

# Quick Start Guide

Version 1.0.0

## Product Appearance

## Add Device

Please ensure that your mobile phone has connected with Wi-Fi.

### Step 1: Download and log onto App

- 1 Connect your smartphone to your Wi-Fi network, scan the following QR code to download and install Imou App.

- 2 Run Imou App, and register an account for the first use.

### Step 2 Add Device

- 1 At device list interface, press "+" to enter "QR Code Scanning" interface.
- 2 Scan QR code on the back of the doorbell to get the SN; you can also manually enter the SN on the next page.
- 3 Press Reset Key on the rear panel of the device. If indicator is blue spinning light, it means that device hotspot is on.

## Product Installation

Please ensure that the device has been added successfully.

- 1 Loosen M3x6 screws at the bottom of the device, and dismantle the installation bracket from the device.
- 2 Drill holes in the wall according to screw hole and cable outlet positions of installation bracket, and install plastic expansion pipes.
- 3 Fix the bracket onto the wall with three ST3x20 self-tapping screws.
- 4 Connect cables.
- 5 Put the device into the slot at the top of the bracket from top to bottom.
- 6 Fix the device onto the bracket with M3x6 screws.

- 4 Connect mobile phone Wi-Fi with device hotspot.
- 5 Go back to Imou app page, and set password for your doorbell.
- 6 Follow the App guide to connect your doorbell.

## FAQ

- Q: The device cannot boot up?**  
Please confirm whether power voltage of the device is normal, and whether power cable is well connected.
- Q: Connection is overtime?**  
a. The device, mobile phone and router are too far away. Please put them within 30cm (12 inches) when configuring.  
b. Please reset the device to factory defaults and follow the guide on App page to try again.
- Q: The device is not online?**  
Please check the state of device indicator light. If blue light flickers all the time, it means that the device fails to connect the network. Please check whether wireless router can connect the network; connect your mobile phone with this wireless network to test it. If it can connect the network, please reset the device and configure again.
- Q: How to upgrade the firmware?**  
Enter "Me > My Device" to find the device, and view cloud upgrade menu. If there is new program prompt (a red dot), click to enter upgrade interface. The device will be rebooted automatically after upgrade.
- Q: There is no message when PIR motion detection is triggered?**  
a. Please check whether alarm subscription is enabled.  
b. If it is enabled, please check whether corresponding PIR zone is enabled.  
c. Please check whether zone detection distance is set to be a relatively small range.
- Q: How to restore factory settings?**  
Please press Reset Button on the rear panel of the device for 5s. Blue light will be on for 3s and then turn off; the device will reboot automatically and restore factory default settings.

## Safety Tips and Warnings

The following description is the correct application method of the device. Please read the manual carefully before use, in order to prevent danger and property loss. Strictly conform to the manual during application and keep it properly after reading.

- Please don't place and install the device in an area exposed to direct sunlight or near heat generating device.
